The new PBS KIDS<sup>10</sup> onlimated preschool series "Work IE Out Wombats! follows a playful trio of marsupial sibilings—Malik, Zadie and Zeke who live with their grandmather (named Super) in a fantastical treehouse apartment complex called the Treeborhoad. The residents of the Treeborhoad—wombats, snakes, maose, kangaroas, ligunas, fish, tarsiers and eagles—bring varied skills, abilities, traditions, assorted ways of thinking and different family structures to this diverse and vibrant community of neighbors.

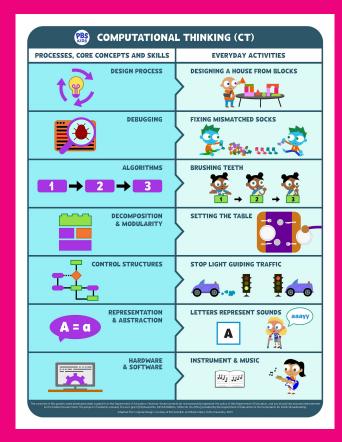

Each day, the Wombats discover an exciting new challenge that puts their creativity and problem-solving skills to the test. And thanks to their collaborative network of family, friends and neighbors across the Treeborhood, they always win the day!

### Curriculum

KIDS

In each story, the Wombats demonstrate computational thinking (CT) for preschoolers a way of thinking that enables them to solve problems, express themselves and accomplish tasks using the practices, processes and ideas at the core of computer science.

When faced with a new challenge, the Wombats stop, take a breath, put their heads together and figure out a fix-using the design process, sequencing, debugging and other key elements of CT.
